FEED MOTION

Robust moving floor hopper
for dosing free-flowing bulk materials

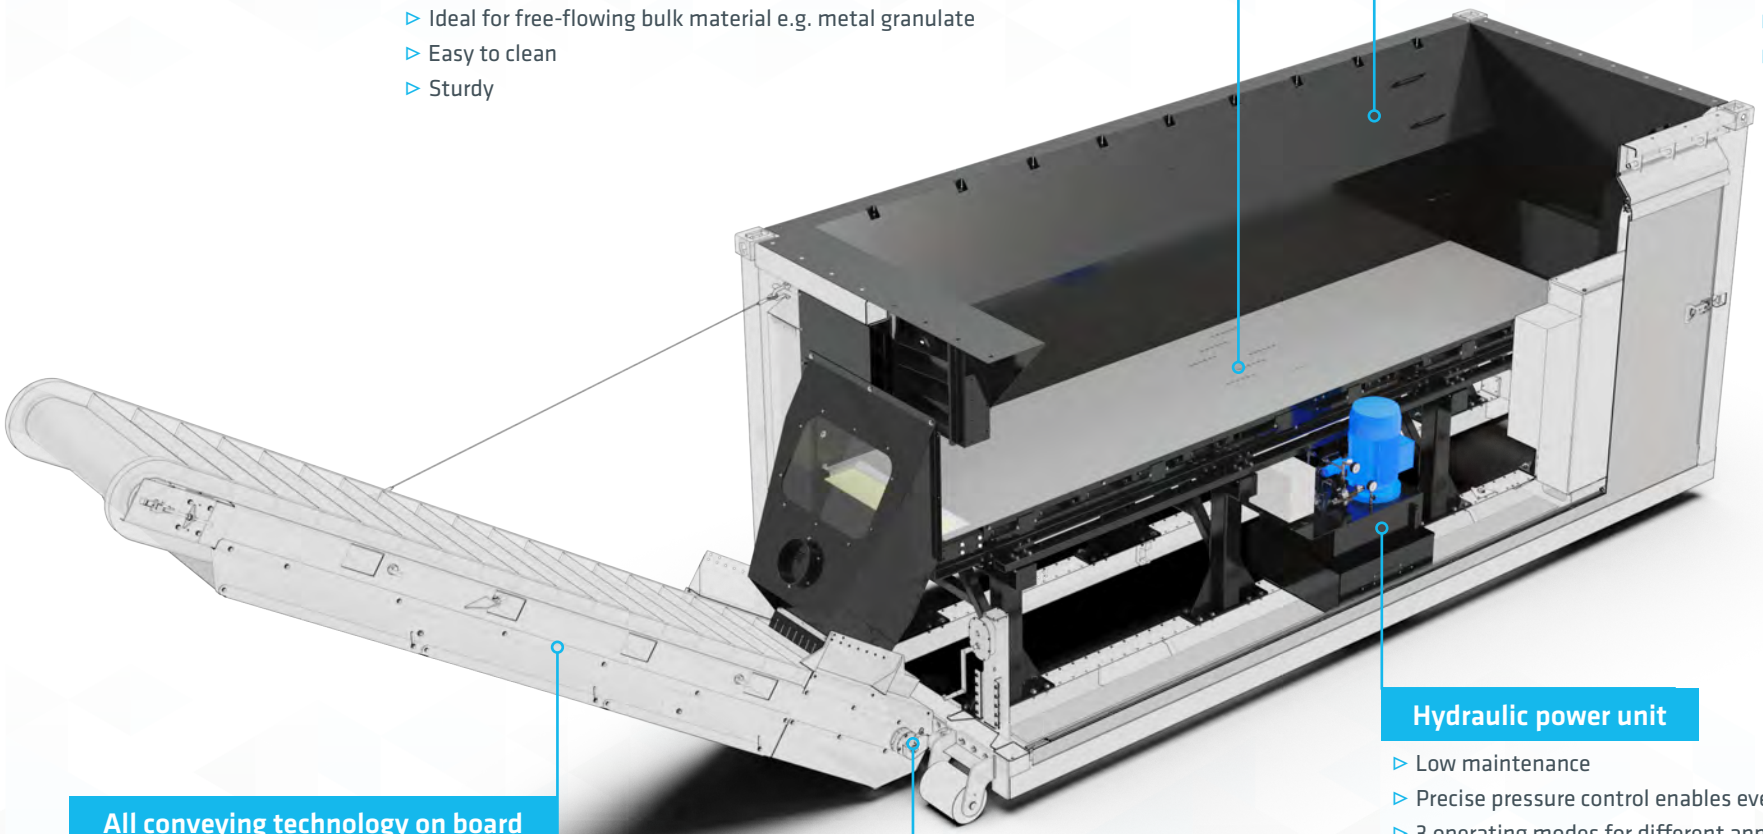
BLUELINE®
FEED MOTION

Walking floor

- Ideal for free-flowing bulk material e.g. metal granulate
- Easy to clean
- Sturdy

Feed Bunker

- Can be loaded with wheel loader
- Up to 18t or 9m³ load



All conveying technology on board

- Extrawide conveyor for even material distribution
- High-effciency drum motors – low-maintenance, durable and reliable!

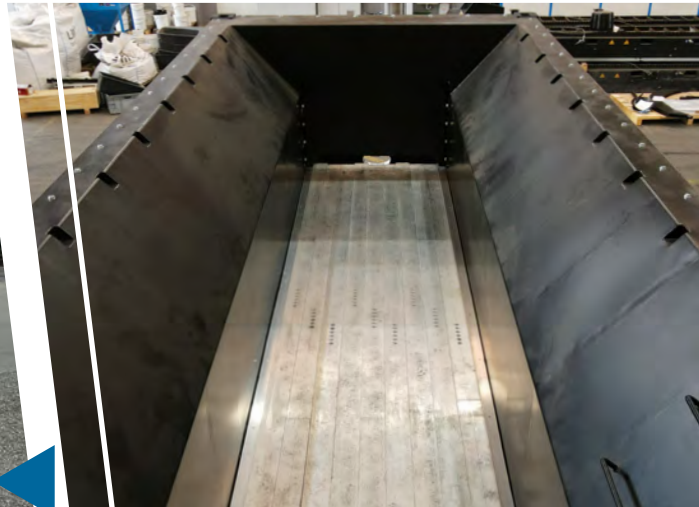
Hydraulic power unit

- Low maintenance
- Precise pressure control enables even dosing
- 3 operating modes for different applications or cleaning

Quick-coupling system

- Tool-free installation of the external belt conveyors thanks to folding arms with snap locking

FEED MOTION

Thanks to its robust design and sophisticated construction, FEED MOTION offers the optimum solution for precise dosing of free-flowing bulk materials such as metal granulates.


With a hopper volume of 9m³ and the proven moving floor technology, it impresses in every respect. The various operating modes allow flexible adaptation to different requirements. The moving floor dosing system guarantees a reliable and economical solution for your processes.
