

# SUPPORT DEDUST

Extraction module for the reduction of dust emissions,  
with forklift loops for easy transport.

BLU<sup>®</sup>LINE  
SUPPORT DEDUST

## Hose connection

- ▷ With 1 x 250 mm diameter and hose lengths up to 10 m

## Discharge

- ▷ With rotary valve for continuous dust removal
- ▷ Hooks for hanging big bags

## Four extendable supports

- ▷ For lifting the module
- ▷ Allows the placement of big bags or boxes for dust collection under the module

## Filtration system

- ▷ Innovative cartridge filter system with automatic cleaning and dust discharge

## High-Performance Fan

- ▷ High suction performances of up to 2.500 m<sup>3</sup>/h (for a hose length of 10 m)

## Touchpad

- ▷ User-friendly Touchpad for configuration of the extraction module

## Compressor system (optional)\*

- ▷ Internal compressed-air supply for fully automatic filter cleaning

\* Alternatively, an external compressed air supply is required

## SUPPORT DEDUST

A compact and powerful extraction module for reducing dust emissions during your recycling process. With its powerful filtration system and ventilators, SUPPORT DEDUST ensures effective dust reduction and reliable airflow – consistent and at low operating costs.

SUPPORT DEDUST is easy to position with a forklift and can be lifted thanks to its four extendable support legs. This allows big bags or boxes to be conveniently placed under the module to collect the dust.
